## APG W Series Audio Ferrofluids for Satellite Woofers in Home Theater System

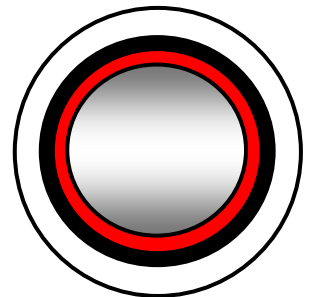

***SPECIAL FERROFLUIDS FOR ACHIEVING  
THE BEST VOICE COIL CENTERING EFFECT  
TO REDUCE COST & IMPROVE PERFORMANCE***

Specifications of basic physical properties

| Product Name | Saturation magnetization / mT | Viscosity @27C / mPa·s | Thermal stability at 170C |
|--------------|-------------------------------|------------------------|---------------------------|
| APG W05      | 40.0                          | 500                    | As same as APG S10n       |
| APG W10      | 40.0                          | 1,000                  | X2 More than APG S10n     |

These ferrofluids are designed to be filled in just one side of magnetic gap divided by voice coil to achieve the maximum centering effect without regular damper. Achieving the best performance without any problems, the speaker design must be properly developed.

Ferrotec wishes to collaborate with your project to develop the new next generation products with lower cost & higher performances. If any questions or detail explanation are needed, please feel free to contact our sales representative in your region.
